

NetApp Interoperability Matrix

Storage Solution : NetApp NFS Plug-in for VMware VAAI

Data ONTAP OS Release Support

When a Data ONTAP release is listed as supported, then all patch releases are supported as well.

However, if the IMT does list a patch release, then only that patch and later patch releases in that Major (8.2, 8.3) / Minor (8.2.1, 8.2.2, 8.3.1, 8.3.2) / maintenance release streams are supported. For example, in the ONTAP SAN Host solution area, ESX 5.5 support for SAN Clustered Data ONTAP 8.2 begins with Data ONTAP 8.2.3P3. Earlier patches of 8.2.3P1 (including 8.2.3 itself) and other minor releases of 8.2.1, 8.2.3 are not supported, but any later patches, such as 8.2.3P4 or later, have implied support. For other minor releases like 8.2.4+ these will need to be verified as supported via the IMT for the solution.

FPOLICY

Partner vendors test and certify fpolicy solutions with NetApp. NetApp does not test or certify partner vendor fpolicy solutions. Please confirm with your vendor if your version and mode of ONTAP is supported.

Info

Note ID	Text
6020	NetApp Virtual Storage Console for VMware vSphere supports the installation of the NetApp NFS VAAI Plugin as of VSC 4.0 release. See documentation for installation details.
10078	Cross-volume cloning with VIB will take more time than without VIB.
