

Netapp Interoperability Matrix

Storage Solution : Tape Drives

Tape drive

Netapp builds support and qualifies only tape drives. A tape Library connected via FC, SAS or pSCSI would be considered supported with Data ONTAP if the following conditions are satisfied.

1. The tape library model is supported by the NDMP qualified backup application (For tape library support contact the backup application vendor)
2. The tape drive within the tape library must be qualified and supported by NetApp. (Please refer to IMT for latest tape drive support matrix)
