

Create Rapid Clones Wizard

Specify the details of the virtual machine clones
How many clones would you like to create and what settings would you like to apply to them?

Storage Controller details
Clone source
Clone destination
Virtual machine folder
Disk format
Virtual machine details
Datastore creation
Datastore selection
Connection broker
Summary

☒ Specify VM Details ☐ Import VM Details

Create new datastore(s)? ☐
Import into connection broker? ☐
Connection broker: VMware View 4.0
Virtual Processors: 1
Memory Size (MB): 4096
Number of clones: 1
Clone name: newClone
Starting clone number: 1
Clone number increment: 1
Power on? ☐
Apply customization specification? ☒
Customization specification: Windows 2008

Sample clone names
newClone

Note: The success of the creation of 2000 or more VMs will be determined by the size and performance of the vCenter server.
